

May 19, 2020

The Honorable Alex Azar  
Secretary  
U.S. Department of Health and Human Services  
200 Independence Avenue  
Washington, D.C. 20201

The Honorable Seema Verma  
Administrator  
Centers for Medicare & Medicaid Services  
200 Independence Avenue, SW  
Washington, DC 20201

Dear Secretary Azar and Administrator Verma:

We recognize and applaud the efforts undertaken by the Department of Health and Human Services (HHS) to quickly mobilize around the distribution of healthcare provider financial relief as made available under the Coronavirus Aid, Relief and Economic Security (CARES) Act. The rapid deployment of these funds has been critical in ensuring that healthcare providers have remained accessible to citizens throughout the United States during the COVID-19 crisis. That said, the primary criteria for accessing any of the \$72.4 billion in HHS financial relief has been a provider's status as a Medicare provider. For healthcare providers who see either no Medicare by virtue of their specialty (such as pediatricians and obstetric providers) or see a very limited Medicare population (such as mental health agencies/substance use disorder treatment providers); financial relief has been nonexistent and is causing a financial crisis amongst providers who treat the most vulnerable among us.

If our behavioral health organizations fail, if our Pediatric, OB and Plastic Surgery practices fail, the patients that they serve will flood into an already over-burdened system including community health centers, urgent care facilities and Emergency Departments (EDs). Once gone, the medical safety net critical to communities across the nation will be significantly damaged.

We certainly acknowledge that HHS originally did not have access to the necessary data to generate financial relief based on Medicaid volumes and, therefore, had to generate a plan to work in concert with State Agencies to collect relevant aggregated claims data to formulate a distribution methodology. That said, providers with the thinnest margins have largely faced the eight weeks of this ongoing crisis with zero assistance. We are, therefore, requesting that HHS prioritize the distribution of the remaining funds to provide immediate and proportional assistance to these largely Medicaid providers who have received no support under previous HHS distributions.

Now that the Centers for Medicare and Medicaid (CMS) have requested specific data from States pertaining to the Medicaid provider network; it is critical that this distribution be forthcoming in the next two weeks to preserve the providers who have committed to serving the most fragile populations. Only rapid action will prevent a catastrophic string of provider closures.

Providers are standing at the frontline of this crisis and remain appreciative of HHS' quick action and believe that only the similar deployment of funds for behavioral health/ pediatricians/ obstetricians will preserve necessary access to care.

Sincerely,

Don Aaron, M.D.
